EXPERIENCE

Environmental Compliance Specialist III

Seattle, WA

Trident Seafoods

April 2020-May 2022

- Built applications to track compliance and data that were compatible with aging computers and limited connectivity.
- Built excel tools to clearly collect and visualize compliance status of 40+ locations
- Improved internal processes to become substantially less time consuming by adding automation and creating systems
- Collaborated with internal legal team to ensure compliance through contract updates and negotiations with external parties
- Successfully managed up to 25 open tasks, ranging in size and difficulty with a variety of different departments

Project Technical II

Remote/Seattle, WA

Tricord Consulting

October 2017-February 2020

- Ensured air and water permitting compliance with reporting, troubleshooting, calculations, and auditing
- Developed and maintained trusting relationships through communication and trust with clients
- Analyzed engineering data and emissions to provide technical, innovative, and strategic solutions
- Reacted quickly to incoming projects and prioritize multiple clients on a daily basis
- Perfected reports that were sent to governmental agencies

Project Engineer, Group Leader, Project Manager

Chicago, IL

Sage ATC Environmental Consulting

July 2015-October 2017

- Managed relationships, scope, schedule and budgets for a variety of projects between \$9,000-\$250,000
- Audited multiple refineries and chemical manufacturing plants against environmental regulations
- Taught classes across the United States about a myriad of regulations
- Briefed questions, ideas, and concerns of Region 3 Project Engineers to upper management

EDUCATION

UNIVERSITY OF WASHINGTON

June 2023
